FOR IMMEDIATE RELEASE

### KAYPRO GIFT ASSISTS USD LAW SCHOOL

The University of San Diego School of Law has received a donation of ten computers from KayPro Corporation to meet the word processing and legal research needs of its faculty and administration and to establish a training center for its students.

"No discipline involves more word processing than the legal profession," says School of Law Dean Sheldon Krantz, "and law schools all over the nation have been computerizing their operations. We are very grateful to KayPro for making it possible for us to meet this need."

In addition to the donated computers, KayPro is providing faculty and staff training and working with the Law School to determine the feasibility of joint venture software development for legal education and the practice of law. USD Law School faculty and staff have been able to purchase units at reduced prices.

KayPro marketing director Lillian Heller explained that KayPro is "committed to helping introduce computer technology in the educational system, not just for teaching and drilling, but to help educators utilize technology to enhance creativity and productivity."

Headquartered in Solana Beach, KayPro originated the digital voltmeter thirty-five years ago and currently employs 600 persons in its regional offices in thirteen cities across the U.S. To date KayPro has donated some 300 computers to secondary schools in San Diego county and more than 200 in Kern County.
